

The Original. Made in Germany.

YOUR BENEFITS

- Excellent precision
- Energy saving
- High production speeds
- Minimised failures and maintenance
- Noise reduced working environment

VIS STANDS FOR

- In-house manufacturing since 1868
- Quality „Made in Germany“
- An extensive assortment of products
- Short delivery times
- Reliable service and excellent consulting
- First class product training
- Installation by experienced technicians

LOGISTICS

Conveyor belts for logistics

OUR PRODUCTS

have the following characteristics:

- Antistatic
- High operational safety
- Outstanding shock-absorbing properties
- Wear and tear resistant materials
- High conveying stability
- Low noise level operation
- Variety of surface structures

In all areas of picking, packing and distribution **VIS** products are used to provide an easy outward transfer and handling of cargo through their very smooth, hard surfaces.

VIS offers, especially for this sector, a wide range of types for varying conveyor tasks. Optimised design belt types for horizontal, inclined or curved conveying as well as various power transmission and conveyor belts, offer a trouble-free and precise workflow. The high performance of VIS products can be seen in their outstanding shock-absorbing properties, conveying stability and simple and easy assembly.

AREAS OF EXPERTISE

Packaging industry

Mail order

Order picking systems

Distribution centres

Letters and parcels postage

RELIABILITY

In the logistics sector precision and reliability of conveying systems are vital. **VIS** provides its customers with German quality products that are constantly antistatic meeting the requirements for effective operating conditions in logistics.

Laterally stiff designed belts that guarantee they will lie flat and continue to run in a straight line reliably are just as sought after as thin, flexible conveyor belts with high friction values. The optimal combination of materials and structures provide the belts and straps with a long life span, precise belt operation as well as a trouble-free processing cycle.

Our high degree of flexibility allows for bespoke product solutions tailor-made for you!

VIS product recommendations for this sector:

S 5/2 E V03N/0	PVC	11,7 mm	Ø 25mm
S 5/2 E V04GST/0	PVC	12,0 mm	Ø 40mm
S 8/2 E V10L/U0	PVC	12,6 mm	Ø 60mm
S 8/2 E V17AR/U0	PVC	15,2 mm	Ø 50mm
S 12/2 E V10N/U0 FR	PVC	12,5 mm	Ø 60mm
F 4 GG 30	ELASTOMER	12,9 mm	Ø 30mm
C 5 G-ART 60	ELASTOMER	15,8 mm	Ø 80mm
